

Certified Lean Kanban Foundation (KMP1)

Course Overview

Certified Lean Kanban Foundation (KMP1) is a highly interactive two-day course accredited by the Lean-Kanban University (LKU) and provides in-depth training in Kanban principles and the principles that underpin the Kanban method, including a fully immersive Kanban simulation.

Kanban is a popular framework designed to help teams work together more effectively on projects of any size. There are many advantages of using the Kanban method, such as increased flexibility, focus on continuous delivery, reduction of wasted time, and increased productivity and efficiency.

The Kanban method is an evolutionary approach to change and change management by starting with what you do now, current roles, responsibilities and job titles, encouraging acts of leadership at all levels and agreeing to pursue incremental, evolutionary change that evolves business processes using a Kaizen approach that reduces the risks associated with complex change programmes.

This course meets the requirements of Kanban Management Professional 1 (KMP1).

Course Objectives

Throughout this interactive Kanban training course, delegates learn to guide a team in their adoption of Kanban, support the team in day-to-day operation, help teams identify and resolve hindrances to flow, take measurements and create meaningful metrics and evolve processes and practices according to team needs.

Outcomes

On completion of this course, you will be able to:

- Identify sources of dissatisfaction
- Analyse demand vs capability
- Model the knowledge discovery process
- Design Kanban systems and their visualisations
- Prioritise movements
- Identify classes of service
- Create a rollout plan

Who will this course benefit?

Kanban is designed to work across multiple functions of an organisation and help teams work together and communicate more effectively. Implementing a Kanban approach can benefit all types of professionals, from senior members who are looking to adopt Lean Management, to members of delivery teams wanting to improve their working practices.

This course is particularly beneficial for anyone who wants to be successful when using Kanban in their organisation, or anyone who works with teams utilising Kanban. It is useful to both those who are new to Kanban, and to those who have

previously explored Kanban and now want to use their knowledge in a practical setting.

Is this an accredited course?

Yes. This course is accredited by the Lean Kanban University.

Course Content

- Introduction to Kanban principles
- Identify work items
- Value Streams
- Kanban boards
- Limit work in progress (WIP)
- Make management policies explicit
- Measuring and managing flow
- Sources of variability
- Empirical feedback
- Apply your learning
- Kanban in your organisation

Pre-requisites

There are no pre-requisites for this course. However, delegates are expected to complete the pre-course reading required.
